MY TOP 4 FAVORITE APPS

01

InShot

The perfect video app to get those smooth or quick transitions. Perfect for TikTok and Instagram Reels. Has tons of editing features to choose from.

PicMonkey

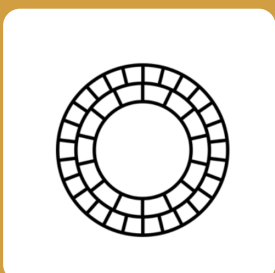

02

An alternative to Canva and Photoshop. You can create social media graphics and it's great for photo editing. The "remove background" feature it's very precise.

03

Retouch

Super cool app to do minor retouches. I love that you can use this app to remove unwanted objects in photos and clone items in a photo.

VSCO

04

Compared to Lightroom, I love the filters on this photo app. You can now have unique filters on top of video clips.

HONORABLE MENTION

MilaNote

The perfect app to organize your content. For when you have a special project, photoshoot, or creating the layout for a website, this app easy-to-use tool to organize your ideas and projects into visual boards.
